

Product Code:

# 4111

# AG11 Longterm

Concentrated longterm coolant fluid

Meets the requirements:

ASTM D3306, ASTM D4340, ASTM D4985,  
SAE J1034, NATO S759, VAG TL 774C.

MANNOL AG11 Antifreeze Concentrate is a concentrate, intended for year-round use in any modern aluminium and copper cooling systems, which are using antifreeze on ethylene-glycol-basis. Protects against corrosion and scaling. No foam, neutral to gaskets and sleeves. Gives sufficient anti corrosive properties already at concentration of 20%. Does not contain nitrates and phosphates.

Lifespan: 3 years.

Water ratio, % (by volume)	Coolant ratio, % (by volume)	Pour point °C
65	35	-20
60	40	-25
55	45	-29
50	50	-38

Volume:

1L	MN4111-1	20L	MN4111-20
5L	MN4111-5	60L	MN4111-60
10L	MN4111-10	208L	MN4111-DR
1000L	MN4111-IBC
