

Product Code:

7901

CHAIN LUBE

MANNOL Chain Lube is a fully synthetic grease for highly loaded and fast-moving chains of street and racing motorcycles as well as custom bikes. It distinguishes itself by its resistance to high (up to 260 °C) and low temperatures as well as water, dust and soiling. The microceramic elements contained in the composition of the grease ensure reliable lubrication and anti-scuffing properties. This product prevents chain stretching, which extends its working life.

Product Characteristics:

Characteristics	Method	Unit	Value
Short Name	DIN 51502		KF2P-40
Soap			Lithium
Worked Cone Penetration	GB/T269	1/10mm	265 - 295
Working Temperature		°C	-30 - 180
Dropping Point	GB/T4929	°C	260
NLGI-Class			2

Volume: 200 ml
