8121

WHITE GREASE

MANNOL White Grease is a lithium-based grease that is thermally stable to a high degree and extremely wash-resistant. It ensures a reliable lubrication of metal separate parts. The composition contains corrosion inhibitors that reliably protect the treated surfaces from oxidation and wear. The grease is ideally applicable to vehicles, watercraft, agricultural and garden equipments, industrial business, in everyday life etc. This product is used for separate part lubrication and protection of brake systems, battery clips, door locks and hinges, bonnets and boots, windshield wiper mechanisms, window lifts, seat runners, metal levers, ropes and other different kinds of moving mechanisms.

Product Characteristics:

Characteristics	Method	Unit	Value
Short Name	DIN 51502		KF2K-30
Soap			Lithium
Colour			White
Working Temperature		°C	-30 to +120
Dropping Point	GB/T4929	°C	190
NLGI-Class			2
ASTM Worked Penetration	GB/T269	1/10 mm	265-295

Volume: 450 ml
