

MANNOL Diesel Ester Additive 9930

Comprehensive antiwear additive for all types of diesel fuel. It provides lubrication of friction units of the fuel system and protects them from corrosion. Removes impurities and prevents deposits. Increases the cetane number by 1-2 points, reduces fuel consumption and prevents its oxidation and separation. Restores the elasticity of rubber seals. Reduces exhaust emissions.

Application: Add to the tank in a ratio of 50 ml per 50 l of fuel. Recommended for regular use.
